Online Library 5 Whys Lean Deployment

The 5 Whys is a 'lean' process, therefore it must allow us to pick one path and carry out just the required corrective measures in order to solve an issue. Hence, a lot of times you will have to pick just one out of multiple paths, and stick with it. In case the problem reoccurs, then you can opt another route for solving it.

iSixSigma

Five whys (or 5 whys) is an iterative interrogative technique used to explore the cause-and-effect relationships underlying a particular problem. The primary goal of the technique is to determine the root cause of a defect or problem by repeating the question "Why?". Each answer forms the basis of the next question. The "five" in the name derives from an anecdotal observation on the number of ...
