AP Chemistry Qualitative Analysis and Chemical Bonding Lab

Introduction to Qualitative Analysis •

Online Library Chemfax Labs Qualitative Analysis And Chemical Bonding

Qualitative analysis is used to separate and detect cations and anions in a sample substance. • Qualitative analysis is the procedure by which one can determine the nature, but not the amount of species in a mixture.

**Qualitative Analysis - Texas
Christian University**

Online Library Chemfax Labs Qualitative Analysis And Chemical Bonding

In qualitative analysis, the ions in a mixture are separated by selective precipitation. Selective precipitation involves the addition of a carefully selected reagent to an aqueous mixture of ions, resulting in the precipitation of one or more of the ions, while leaving the rest in solution.

Qualitative Analysis And

Chemical Bonding

In qualitative analysis, the identity, not the amount, of metal ions present in a mixture is determined. The technique consists of selectively precipitating only a few kinds of metal ions at a time under given sets of conditions. Consecutive precipitation steps become progressively less selective until almost all the metal ions are precipitated.
