The Art of Computer Programming (TAOCP) is a comprehensive monograph written by computer scientist Donald Knuth that covers many kinds of programming algorithms and their analysis.. Knuth began the project, originally conceived as a single book with twelve chapters, in 1962. The first three volumes of what was then expected to be a seven-volume set were published in 1968, 1969, and 1973.

The next step on our journey is insertion sort. It is very similar to selection sort, but adds a little bit more ingenuity. This is the next logical step and gives us the the last piece of the puzzle to start building more advanced algorithms. This is why computer science classes typically cover this sorting algorithm here.
