1. Place the grasshopper in the dissecting pan. Locate the head, thorax, and abdomen. (See Figure 1.) Use your hand lens to observe the grasshopper carefully. As you observe, record your data in Observations.

2. Observe the parts of the head. The grasshopper has two compound eyes and three simple eyes. The sensory parts located

Grasshopper Sparrow is easy to overlook throughout its range. When not singing its quiet, insectlike song from atop a stalk in a weedy pasture, it disappears into the grasses where it usually runs along the ground rather than flies. As sparrows go these birds are lightly marked, buffy tan with clean, unstreaked underparts contrasting with brown, gray, and
