made of living organisms. To a chemist, the world is made of molecules formed from atoms. If you ask that question of a physicist, the physicist will probably start by talking about atoms, and then proceed to talk about the protons, neutrons and electrons that make up

What is the World Made of?

They cannot be proved, but sadly, such theories are often presented as facts. In order to help us answer our question about how the world was made, even in part, we can refer to the oldest text that we have about it, that found in the first chapter (one page) of the first and oldest book of the Holy Scriptures, the Book of Genesis. (Genesis means Birth).

How Was the World Made? Facts and Theories ...

What Is the World Made of? By Sharon Janis . This universe isn't just some kind of inconsequential, random spark that has blasted through a big black hole somewhere beyond the space/time continuum. It may be that, but it is also much more than that.

The Wisdom of "Bull Durham" | Psychology Today

The World is Made of Glass is a novel about one man and three women in a conflict that explores the fine line between love and hate, good and evil, fantasy and reality. The narrative is founded on fact: a case history recorded in the autobiography of Carl Gustav Jung. His account is brief and curiously cryptic: "A lady came to my office.

How The World Was Made. The earth is a great island floating in a sea of water, and suspended at each of the four cardinal points by a cord hanging down from the sky vault, which is of solid rock. When the world

grows old and worn out, the people will die and the cords will break and let the earth sink down into the ocean, and all will be water again.
