production, distribution, and consumption of goods and services. It studies how individuals, businesses, governments, and nations make choices on allocating resources to satisfy their wants and needs, and tries to determine how these groups should organize and coordinate efforts to achieve maximum output.

distinct from other economics textbooks in that it does not focus solely on the study of economic concepts and principles. More importantly, it challenges the students to apply theories and concepts in understanding the economic realities around them leading to the making of a simple business plan.
