Plants, People, Planet aims to publish outstanding research across the plant sciences, placing it firmly within the context of its wider relevance to people, society and the planet. We encourage scientists to consider carefully the potential impact of their research on people's daily lives, on society, and on the world in which we live.

Plants, People, Planet | PUBLONS

Using arid North America ("Aridamerica") as a laboratory for the future, we employed 18 criteria to select 17 desert plant genera with high potential as food crops. When integrated into perennial polycultures modeled after arid ecosystems and traditional knowledge, desert plants can stabilize yields, produce disease-preventing foods, and ...

HOW IMPORTANT IS PLANT-BASED MEAT FOR THE PLANET? It's no secret that people like meat. They like it so much that the world produces a staggering 320 million tonnes of meat per year. (That's more than the total mass of every human on earth, FYI.) Global meat production has more than quadrupled in the past 50 years.
