### Rats Observations On The History

Love them or loathe them, rats are here to stay-they are city dwellers as much as (or more than) we are, surviving on the effluvia of our society. In Rats, the critically acclaimed bestseller, Robert Sullivan spends a year investigating a rat-infested alley just a few blocks away from Wall Street. Sullivan gets to know not just the beast but its friends and foes: the exterminators, the sanitation workers, the agitators and activists who have played their part in the centuries-old war between ...

### Rats: Observations on the History & Habitat of the City's ...

Rats have conquered every continent that humans have conquered, mostly with the humans' aid, and the not-so-epic-seeming story of rats is close to one version of the epic story of man: when they arrive as immigrants to a newfound land, rats push out the creatures that have preceded them, multiply to such an extent as to stretch resources to the limit, consume their way toward famine-a point at which they decline, until, once again, they are forced to fight, wander, or die.

Summary: Thoreau went to Walden Pond to live simply in the wild and contemplate his own place in the world by observing nature. Robert Sullivan went to a disused, garbage-filled alley in lower Manhattan to contemplate the city and its lesser-known inhabitants -- by observing the rat. Rats live in the world precisely where humans do; they survive on the effluvia of human society; they eat our garbage.

### Rats : observations on the history and habitat of the city ...

Aside from his own observations Sullivan delves into the literature of rats in New York City and individuals who are intimately involved with rats. As a result of his research he arrives at many interesting conclusions. Most attention to rats throughout the history of the city is focused on the conflict between man and rat.

Food: Rats will eat anything a human will, and more. But worse damage is done by their urine and feces which are left behind on any uneaten food. Burrows: Although rats may create damage with their borrowing, it's usually more superficial than structural. Chewing: Since their front teeth grow all their lives rats, chew on things to keep them worn down. This can be dangerous when they gnaw on electrical wiring.
