Giddy there, I have just watched an interesting talk about hardware assisted tracing and profiling at Embedded Linux Conference. I need to do some profiling of user-space code and was hoping to make use of these facilities on a Zynq-7020. However, it appears this may be problematic as described a...

Xilinx ISE is a design environment for FPGA products from Xilinx, and is tightly-coupled to the architecture of such chips, and cannot be used with FPGA products from other vendors. The Xilinx ISE is primarily used for circuit synthesis and design, while ISIM or the ModelSim logic simulator is used for system-level testing. Other components shipped with the Xilinx ISE include the Embedded ...

Under the Open RAN Policy Coalition, Xilinx will continue to collaborate with members and key stakeholders to ensure 5G and future networks will be openly developed, interoperable, and adaptable.

Xilinx Joins the Open RAN Policy Coalition | SemiWiki

Xilinx is the only (as of 2007) FPGA vendor to distribute a native Linux freeware synthesis toolchain. Xilinx announced the architecture for a new ARM Cortex-A9-based platform for embedded systems designers, that combines the software programmability of an embedded processor with the hardware flexibility of an FPGA.
